"The Student Coin was created to introduce the world of cryptocurrency and blockchain to students. STC is a coin that aims to tokenize modern education systems and create a multi-university blockchain network that connects universities worldwide."

"It is easy to notice that Student Coin project is extremely ambitious, and also revolutionary on many levels. It allows you to think realistically about its future and development. We are sure that nobody hasn't done such a thing yet and the potential that this currency contains is unlimited."

"Tokenization for the future. The word used by this project is academically-focused tokens. This is one of the critical long term goals of setting up STC. Every single university integrated into the system can have its tokens based on the central currency STC."

General information

Project's leading Idea

To create the first worldwide academically-focused blockchain, supervised by universities and research faculties, aimed to revolutionize modern education.

Coin name:
Student Coin

Coin ticker:
STC

The Student Coin is the first cryptocurrency related to the net of universities. The aim of the project is to create a valuable coin to educate and integrate students around the world and tokenize the modern education system. Student Coin project is run by students, faculties, and entrepreneurs from 16 universities, including the Kozminski University, New York University, Harvard University, Stanford University, University of Oxford, London School of Economics, University of Warsaw, Maastricht University, Imperial College London and 7 more schools.

The universities are always a place of innovations, new technology research, and the source of great ideas. What is more, the universities around the world are well connected and have a lot of external value transfers. Finally, the world educational market is one of the fastest-growing sectors, and it needs serious blockchain-based solutions as Student Coin. These three factors made universities a perfect place to create the first university-to-university blockchain network, similar to the Internet and social media began.

The Student Coin aims to create a multiuniversity blockchain network and connect schools around the world, enabling them to interact in the non-monetary tokenized way, as well as store data on the blockchain and create their own university tokens. The main advantage of the STC program is the full support of academic faculties, with a professional business-driven and educative approach.

The Student Coin is listed at cryptocurrency exchanges, allowing it to be traded and owned. The project is a first academic program that directly educates students about the blockchain technology, cryptocurrency exchanging, the cryptocurrency markets - allowing them to trade, invest, send or receive Student Coins, as well as gives classes about personal finance and new technologies. The list of supported universities, students, and faculties is constantly updated. All the faculties, students, and alumni from over 500 supported universities are eligible to receive the one-time 100 STC airdrop – using their university email.

The purpose of the project

The project is divided into two main parts

The educational part that aims to teach students about the blockchain, tokenization, new technologies, and personal finance, as well as to create an international close-knitted academic community between universities

The tokenization part whose goal is to tokenize universities, provide the blockchain technology as the store of students' data, create the single university tokens, and build the international academic ecosystem based on Student Coin

What is more, the project will build a Student Coin based multi-university ecosystem with the STC powered solutions as

STC Terminal

the software for universities, student organizations and faculty to create and easily manage their tokens

STC Exchange

the publicly available exchange with all the university tokens traded only to STC. A place for the Student Token Offering performance and university-based startups fundraising.

Student App

the international mobile application for iOS and Android to store, swap, and easily use the utility of the tokens created in the Student Terminal.

The educational part of student coin

In the world of extreme development speed and very fast Internet, it is hard to keep up with every technology trend, hence there is a very small group of people who need deeply understanding the blockchain idea, cryptocurrencies, and new technologies. The Student Coin aims to create the world's biggest educational database about blockchain, tokens, tokenization, cryptocurrencies, new technologies, economics, and personal finance. This database will be a great tool for universities and students to connect to and enhance global education.

The educational part of the project is extremely important to build the awareness around Student Coin, launch the Partnerships with the worlds' leading universities and student organizations that became Student Coin Partners.

The educational part of the project is extremely important to build the awareness around Student Coin, launch the Partnerships with the worlds' leading universities and student organizations that became Student Coin Partners.

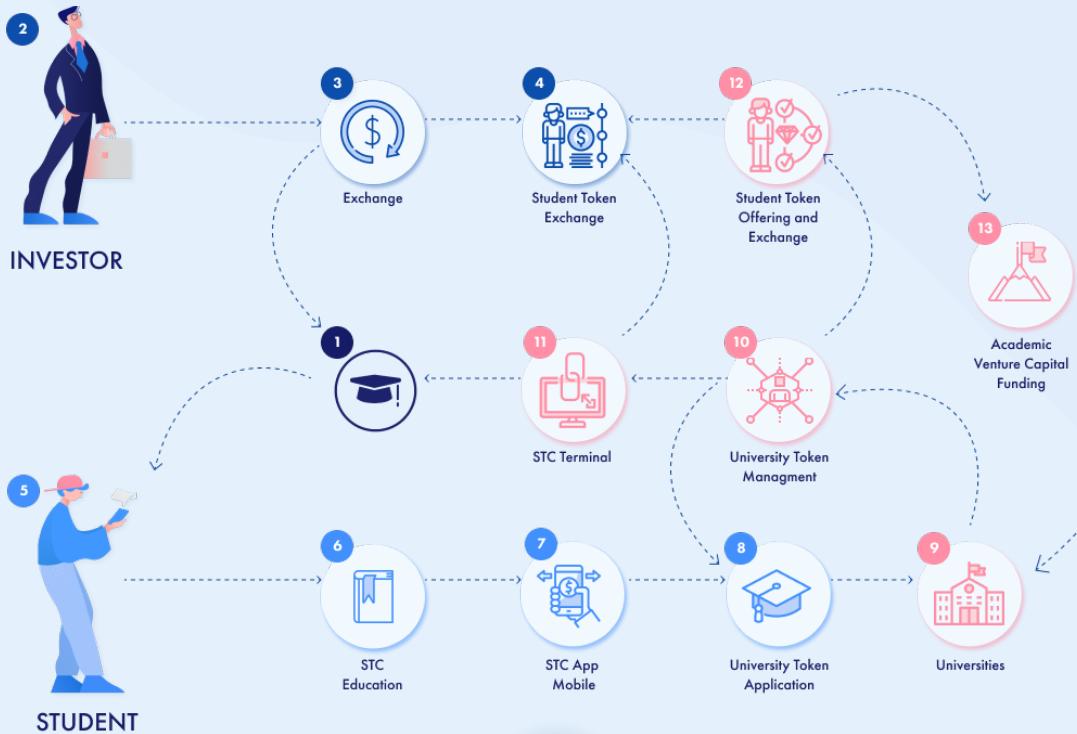

The Student coin educational website:

 <https://studentcoin.org/>

Student coin as the universities' tokenization leader

The most important long-term aim of Student Coin is to create the tokens for every single university, that will be based on Student Coin – as the reference currency. Partner student organizations, universities, and students will have access to the open-source tool called STC Terminal, which will allow easy creation and management of their tokens as Oxford Student Token or Stanford Student Token. What is more, the tokens will be freely traded at incoming STC Exchange to STC, in pairs as OXF/STC or STN/STC.

Student Coin Decentralised Ecosystem for Global Higher Education

1

STC works as the token powering the tokenization of the higher education, is a template and reference currency for all incoming university' tokens

3

STC will be listed at world top cryptocurrency exchanges allowing everyone to participate in development of tokenization in the global education.

5

The group of Students from over 500 supported international universities, that are joining every year as fresh students and remaining as alumni

7

The first International Student Wallet called "Student App" that allows students to store tokens and apply their utilities at campus facilities as well as during the online learning.

9

Partner student organization and faculty supervising the development of the university tokens

11

Easy in use and free STC terminal for schools allowing managing the university tokens, apply blockchain as the store of grades, diplomas and all students' data.

13

Via the STC Exchange students and student organizations can fund their projects, while investors form everywhere can have access to participate in funding for shares/tokens.

2

Investors are holding the Student Coin to earn from SC Terminal and Student Coin Exchange. And participate in all Student Coin Offerings or Academic Venture Capital Funding.

4

STC exchange will be a place to perform all SCO and trade the university tokens as Oxford Student Token or Melbourne Student Token to Student Coin in pairs OXF/STC , MLB/STC.

6

World biggest educational panel about personal finance, blockchain, tokenization and entrepreneurship, that works basing on the STC.

8

Students uses tokens and their Student App for purchases at campus, voting, class grading, identity proving, venture capital funding, attention awarding and many other functions.

10

University defines the required applications and utilities for its token and distribute it for students via Student App, the token is also listed at STC Exchange

12

School can perform Student Token Performance allowing the involvement of worldwide investors to fund their universities and projects, the university tokens are traded only with STC.

8

Student coin utilities

The usage options of the STC will be systematically added and updated. The major utility establishments are planned to be launched at the end of 2021, however, STC can be already used in some universities and applications.

What is more, the project is open for students around the world to build their own STC based university tokens as Oxford Student Token.

The main two utilities of the STC are the establishment of the STC Terminal, that allows the advanced tokenization of universities and powering the educational panel, which will become the world-leading blockchain and personal finance database.

Moreover, SC already works as a utility token to:

- ✓ **Vote the projects' development plan**
(at <https://www.studentcoin.org/voting>)
- ✓ **Allow students to sign petitions using SC as the blockchain proof of identity**
(at <https://www.studentcoin.org/voting>)
- ✓ **Access to the premium investing and trading workshops**
- ✓ **Create the first complex blockchain educational panel**
(at <https://www.studentcoin.org/education>)
- ✓ **Educate students about asset trading and exchanging**
(at waves.exchange/trade/STC/BTC)
- ✓ **Create the multi-university system for the internal and external value transfer**
- ✓ **Create a new international cryptocurrency research cooperation**
- ✓ **Integrate the students from different schools and regions**
- ✓ **Integrate the student clubs and organization**

In the main phase of the utility launch phase – Phase 6

Student Coin will be ready the following tasks:

- ✓ Create the dedicated university tokens based on Student Coin
- ✓ Launch the utility for the university tokens
- ✓ Trade university tokens at STC Exchange
- ✓ Perform the SCO (Student Coin Offering) at STC Exchange
- ✓ Perform the fundraising for student organizations projects
- ✓ Perform the fundraising for the university-based startups
- ✓ Create a university project's based on the Student Coin Network
- ✓ Tokenize the basic utilities and university life expenses
- ✓ Build the close-knitted blockchain research society
- ✓ Fund the student's charity projects
- ✓ Fund the student's research labs
- ✓ Use Student Coin in non-monetary value exchanges
- ✓ Use Student Coin in the student clubs fund clearing
- ✓ Use Student Coin as the currency for online lectures and webinars
- ✓ Use Student Coin as the payment option for the tuition fees
- ✓ Use Student Coin as a unified currency for Erasmus and other exchanges program.

What's more, Student Coin will also be easily swappable into any of the single university tokens, that will have much wider applications that are defined by the host university. Check the next section for more details.

University tokens based on student coin

STC Terminal will enable advanced university tokenization. All schools, student organizations, or even single lecturers will be able to create their own tokens that will be stored in the Student App. After the launch of the token, its utility will be managed in the STC Terminal to fit into the tokenization purposes.

The wide international network of connections with the most important universities, faculties and highly involved students make SC the only project in the world that can launch the tokenization of schools on a bigger scale.

Student Coin will be the main reference cryptocurrency for all university tokens.

Exemplar university tokens will be launched during Phase 5:

- Oxford Student Token
- KU Student Token
- Harvard Student Token
- Kapitalni Club Student Token
- Attention Student Token
- Parking Place Student Token

All tokens will be offered at STC Exchange and traded to STC, hence with the growth of the capitalization of any supported token, the value of Student Coin may also increase.

Some utilities of Student Coin-based university tokens:

- ✓ Identity Check during exams
- ✓ Voting in the university elections
- ✓ Awarding the most active students
- ✓ Awarding the best-rated lecturers
- ✓ Awarding the activity during classes
- ✓ Improving student clubs
- ✓ Admission into student clubs
- ✓ Admission into university
- ✓ Internal value transfer between student clubs
- ✓ Fundraising for the charity
- ✓ Fundraising for research projects
- ✓ Fundraising for the university-based venture capital
- ✓ Accessing the premium lounges at student events
- ✓ Accessing the premium options in the library
- ✓ Receiving food and café discounts at the university's' canteen
- ✓ Receiving food and café discounts at partner's clubs
- ✓ Receiving special holders parking places
- ✓ Receiving a "token scholarships" as bonus payments
- ✓ Paying the library fees.
- ✓ Getting extra points into the Erasmus program and other student exchange programs
- ✓ Supporting the sports representatives

STC logo

The official Logo of the
Student Coin project

The logo relates to the Student cap – the European traditional sign for the student's community and the dark blue color, that signifies the technological advancements.

The color of the logo may vary on other Student Coin designs

Project development plan

The project is divided into four major phases with worldwide open-source access for university faculties, students, and academic organizations.

Backend preparation (01.2018 – 03.2020)

- ✓ Establishment of the Student Coin team
- ✓ Settlement of the code for the Student Coin
- ✓ The formalization of the project structure
- ✓ Formalization of the legal structure
- ✓ Setting the project's budget and promotion scheme
- ✓ Launching the Waves token version
- ✓ Listing at Waves DEX exchange
- ✓ Preparation for the First Student Airdrop

Phase I

Token Launch (03.2020 – 06.2020)

- ✓ Distribution of the first part of SC for Kozminski
- ✓ University students and faculty
- ✓ Creation of the official website
- ✓ Creation of the official market StudentCoin/BTC
- ✓ Launching the SC/BTC trading and liquidity solution
- ✓ Preparation of the first utilities for the SC in events access
- ✓ Preparation of the utility in student clubs involvement
- ✓ Establishing the voting system
- ✓ Distribution of STC tokens around the first 60 universities
- ✓ Gaining the first 5 000 users
- ✓ Listing at Kanga Exchange

Phase II

Phase 3

Initial international distribution (07.2020 – 10.2020)

- ✓ Launching the Ethereum blockchain as the second mainnet for Student Coin
- ✓ Allowing students to hold tokens on 5 mobile apps and all PC and MAC Ethereum wallets
- ✓ Listing at 3 international exchanges
- ✓ Launching the first STC based students' petition signing
- ✓ Distribution of coins at 10 major worldwide universities
- ✓ Creating the research team for the blockchain economics research
- ✓ Listing at Coinmarketcap

Phase 4

Student Token Offering and the top project launch (10.2020 – 08.2021)

- ✓ Preparation for the Student Coin Offering SCO
- ✓ Presale performance
- ✓ Launching the complex educational panel
- ✓ The major SCO (Student Coin Offering) performance
- ✓ Listing of the Student Coin at major crypto exchanges
- ✓ Starting the work for STC Terminal,
- ✓ STC Exchange and Student App
- ✓ Developing the project into the leading, world's first universities' cryptocurrency
- ✓ Distribution of Student Coin to the world's top 50 universities, including Harvard University, Stanford University, London School of Economics and the University of Oxford.

Phase 5

Establishing the universities' ecosystem (08.2021 – 10.2022)

- ✓ Launching STC Terminal
- ✓ Launching STC Exchange
- ✓ Launching Student App
- ✓ Preparation of the first 10 tokens that bases on the SC
- ✓ First STC Exchange listings
- ✓ Tokenization of the first Student Organization
- ✓ Tokenization of the first professor
- ✓ Tokenization of the first university

Phase 6

Leading the world universities' tokenization (10.2022 – end of 2023)

- ✓ Launching the university-based venture capital funding at Student App
- ✓ Launching the first fundraising for the student organizations
- ✓ Preparation for the massive universities tokenization
- ✓ Preparing the native blockchain launch with the enhanced datastore
- ✓ Gaining a strategic partnership with the world's top universities and organizations

Establishing the universities' ecosystem (2024 +)

- ✓ Launching the native blockchain solution
- ✓ Launching the option to tokenize every class and program
- ✓ Launching the solution to tokenize students' attention and involvement
- ✓ Launching the solution to store students' data at blockchain
- ✓ Launching the solution to store all educational data at blockchain, like diplomas, degrees, and grades
- ✓ Connecting all universities and revolutionizing the way how higher education works

Phase 7

Supported universities

Currently, STC supports over 500 universities in 36 countries. The list of universities is being constantly updated according to the new coming Partnerships and community-driven STC distributions. The full list of the supported universities is available at :

Our website:

🔗 <https://studentcoin.org/>

At the Sign Up form:

🔗 <https://www.studentcoin.org/sign-up>

Mobile app and coin wallets

One of the goals of the project is the development of the native mobile app called Student App with the full functionality of the wallet, exchange, and the coin transfer, however, until its establishment, Student Coins can be stored at wallets supporting Waves and ERC-20 tokens. There are some of the community-driven wallets.

Waves Exchange iOS

wallets

Technological specification and coin statistics

The Student Coin runs on Waves blockchain with the Waves-NG protocol, as well as at Ethereum blockchain that enables secure value transfer, transitions, and token exchange. One point in the development of the project is to create a native Student Coin blockchain with the Proof of Stake protocol.

SC tokens can be easily swapped from one blockchain to another – check the detailed manual at: <https://www.studentcoin.org/instruction>

The following table presents major information about Student Coin in comparison to Bitcoin.

Feature	Student Coin	Bitcoin
Ticker symbol	STC [STC]	BTC [BTC]
TOKEN Launch date	02.12.2019	03.01.2009
Maximal number of coins	10 000 000 000	21 000 000

Feature	Student Coin	Bitcoin
The circulating (market circulation) supply of coins	Project launch 30,000,000 STC Presale: 25,000,000 STC SCO: 450,000,000	18,246,875 BTC
Number of decimals	2	8
Burnable	YES	NO
Transaction time	< 59 seconds at Waves ~ 5 minutes at Ethereum	12 minutes
Transaction fee	1 STC (0.0001 USD) at Waves 0.1–2 USD at Ethereum	0.0001 BTC (1 USD)
Native Blockchain	Waves + ERC-20	Bitcoin mainnet
Cryptocurrency type	Token with open programmable code and cross-chain solution	Cryptocurrency with mainnet chain
Tradable on exchanges	5 exchanges	All exchanges
Officially tradable pairs	STC/BTC STC/ETH STC/USDT	Altcoins /BTC Fiats/BTC
First launch price	0.00000025 BTC (25 Satoshi, 0.0025 USD)	0.01 USD
Blockchain explorer	https://stc.explorer.com/ https://etherscan.io/token	www.blockchain.com/pl/explorer

Tokens distribution and mining

All the coins are pre-mined, hence Student Coin is not minable. All STC are distributed through airdrops for students and faculties, while the bigger number of coins can be gathered only via the market. All students are eligible to only receive a one-time airdrop of the value not exceeding 5 USD.

The total supply of Student Coins is 10,000,000,000 STC and the coins in the market circulation (circulating supply) are limited by each of the development phases.

The total supply of coins is reserved for long-term project development (Phase 3+), SCO performance, cooperation with new universities, and founder-community decision (via www.studentcoin.org/voting).

To guarantee optimal project development at each of the phases, sustain the healthy circulating supply, and deliver the small number of Student Coin in the university airdrops, the circulating STC and total supply are flexible till SCO and Phase 4, when it will be reaching its maximum and final value.

The supply of Student Coin by the project Phase

Project Phase	Number of Coins in Circulating Supply	Number of Coins in Total Supply
Backend Preparation 2019/1	3,000,000 STC	210,000,000 STC
Token Launch 2020/2	15,000,000 STC	210,000,000 STC

International distribution 2020/3	150,000,000 STC	2,100,000,000 STC
SCO performance 2020/4	15,000,000 STC	210,000,000 STC
STC Ecosystem building 2021/5	5,085,000,000 STC	10,000,000,000 STC
Universities Tokenization 2022/6	7,120,000,000 STC	10,000,000,000 STC
STC Global Ecosystem 2024/7+	8,000,000,000 STC	10,000,000,000 STC

The big parts of Student Coin are distributed via the big Foundation hold wallets for specific development goals, the following Foundation holds will be established:

STC Backup Wallet (49,35% of coins)

Student Coin Foundation's main wallet with the backup funds, not permitted to move or being traded. Funds from this wallet cannot be realized to the market, STC is reserved only for strategic partnership and universities' holds after the full establishment of STC Terminal, STC Exchange and Student App (Phase 5+)

STC Development Wallet (49,15% of coins)

The Student Coin Foundation wallet with tokens for the SCO – Student Coin Offering performance. The tokens will not be realized directly into the market but will take part in the STC sale (Phase 4 of the project).

STC Team Wallet (0,05% of coins)

The wallet with tokens distributed at the project start to Student Coin Team members, first universities' students, faculty members, and advisory board. These tokens are not held by STC Foundation.

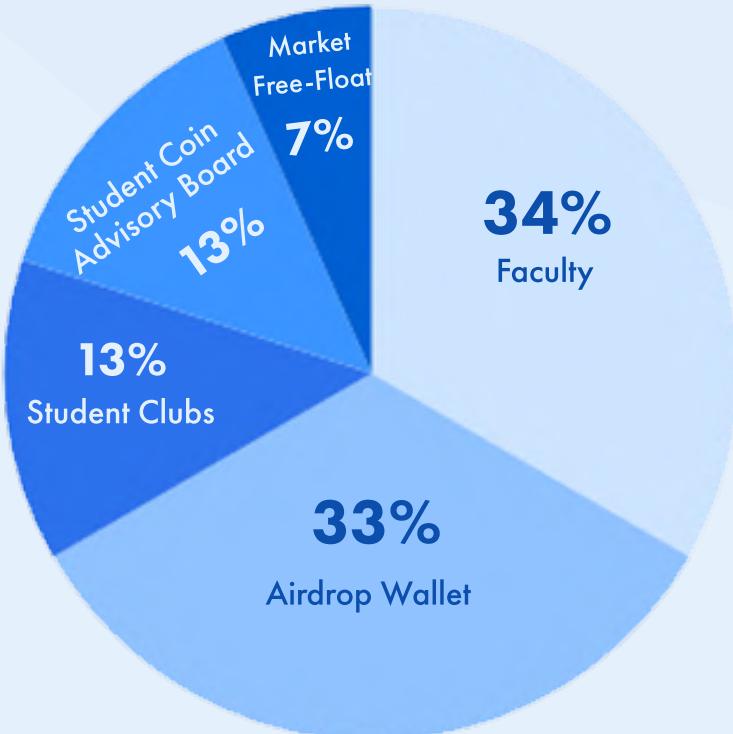

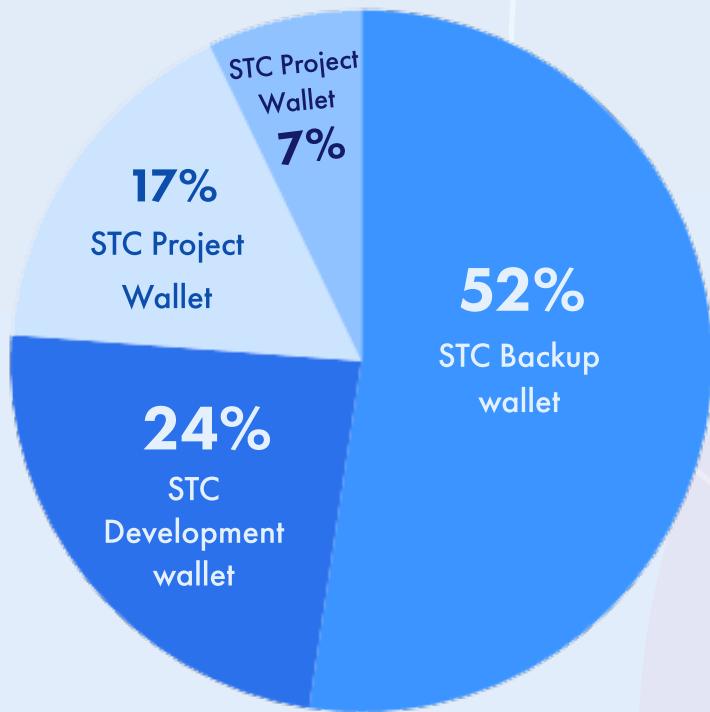

STC Launch Wallet (0,5% of coins)

The Student Coin team development wallet for the Student Coin Launch (Phases 1 – 3) the tokens from this wallet are widely distributed for international students, partner organizations and exchange liquidity. These Student Coins may be realized directly into the market.

The following table shows the planned distribution of coins

Group of STC Holders	Number of Coins
STC Backup Wallet	4,935,000,000 STC
STC Development Wallet	4,915,000,000 STC
Universities' Faculty	50,000,000 STC
Students Airdrops	50,000,000 STC
Student Clubs	13,200,000 STC
Student Coin Team and Advisory Board	30,200,000 STC
Market Liquidity	6,600,000 STC

The graph below presents the percentage distribution of coins of the total supply of Student Coins.

The following graph shows the market supply of coins with available Student Coin for being traded and exchanged:

SCO (student coin offering) of student coin

To fund the project, after the successful competition of phase Phase 3, Student Coin will launch the world's first SCO – (Student Coin Offering).
The funds gained during the SCO will be used to create

Team

The Student Coin Team is built by students, entrepreneurs and faculty from 16 universities, including the Kozminski University, New York University, Harvard University, Stanford University, University of Oxford, London School of Economics, University of Warsaw, Maastricht University, Imperial College London, Warsaw School of Economics, University of Kent, University of Glasgow, University of Melbourne, University College London, Lund University, and University of Glasgow

All parts of the project are financed from the first-month, free-float market distribution, and supporting companies. Cryptocurrency holds, development plan, smart-contract, social media, documentation, and token script property rights are supervised and owned by the company Student Edu Chain Ltd.

The international STC team consists of 51 members.

Student Coin's Core Team Members:

**Wojciech
Podobas**
Student Coin CEO
& Founder

**Caesar
Tabota**
Student Coin CTO

**Dr Andrzej
Kuśmierz**
Chairman of the
Advisory Board

**Peter
Barbachowski**
